# IBM Resilient

## Outsmart. Outpace. Outmaneuver Cyberattacks
**Incident Response with Intelligent Orchestration**

## OVERVIEW

Introducing the next generation of incident response – Intelligent Orchestration. Intelligent Orchestration dramatically accelerates and sharpens response by seamlessly combining incident case management, orchestration, automation, and intelligence into a single platform. It makes response proactive and reactive, and helps improve both incident response and SOC operations.

Intelligent Orchestration helps organizations alleviate the skills gap and other cyber security challenges by infusing incident response with both human and cyber intelligence and enabling faster, more accurate decision making for security teams.

Venn diagram: Orchestration and Automation, Case Management, AI and Human Intelligence — overlapping to form Intelligent Orchestration.

### IBM Resilient empowers organizations to thrive in the face of cyberattacks and business crises.

The Resilient Incident Response Platform (IRP), now with Intelligent Orchestration, is a force multiplier for your security team, driving down your mean time to resolution.

Today, Resilient is at the heart of more than 300 security operations centers in more than 40 countries.

**For more information on the IBM Resilient IRP, schedule a demonstration today: www.resilientsystems.com/demo**

## Features and Benefits:

With Intelligent Orchestration, security teams can achieve real-time visibility across their SOC tools, quick time to value, and guided response that empowers them to outsmart, outpace, and outmaneuver cyberattacks.

**Outsmart cyber threats with the unique combination of human and cyber intelligence**

**Intelligent Orchestration –** *Accelerates and sharpens response*

- Human intelligence and tribal knowledge unlocked and captured in expert IR playbooks
- Automated enrichment that delivers critical incident insight to analysts instantly

resilient

**Case management and reporting –** *Enables complete SOC and c-level visibility across your tools and continual IR improvement*

- Real-time incident dashboards and metrics that help security managers assess, measure, and improve IR capabilities

- Robust executive-level reporting that makes it easy to communicate with the c-suite and boardroom

## Outpace cyberattacks through orchestration and automation across SOC tools

**Automation –** *Eliminates routine tasks and enables analysts to focus on more strategic priorities*

- Feature-rich functional components that make automated actions reusable with minimal coding

- Integrations available on the IBM Security App Exchange for immediate download and use

- Drag-and-drop visual workflow editor that helps team quickly build IR workflows of all types – from simple to complex

**Partner Ecosystem and Developer Community –** *Makes building and deploying integrations faster and easier than ever*

- Enterprise-grade integrations with technology partners provide fast time-to-value of security investments

- Developer tools and documentation allows teams to quickly and easily build and deploy custom integrations

## Outmaneuver cyberattacks with agile and adaptive Dynamic Playbooks and guided response

**Dynamic Playbooks –** *Provides agile response that aligns to real-time incident data*

- Adaptive IR workflows that automatically adjust as an incident unfolds

- Visual drag-and-drop playbook editor that combines people, processes, and integrations

**Guided Response –** *Ensures the right person has the right information at the right time*

- Best practices-based incident response playbooks that guide analysts through an expert-level response

- Automated enrichment that provides critical incident data, enabling faster and more accurate decision making

> *"With Resilient, our time to respond to an emerging threat went from 84 minutes to under two minutes."*
>
> — DIRECTOR OF CYBER SECURITY,
> GLOBAL PHARMACEUTICAL COMPANY

> *"The longest part of the incident response workflow was the analysis and triage on the incidents. Resilient effectively reduced the effort involved by over 80%"*
>

> FORRESTER RESEARCH

## ABOUT IBM RESILIENT

**IBM Resilient is the industry's leader in helping organizations thrive in the face of any cyberattack or business crisis. IBM Resilient's proven Incident Response Platform (IRP) empowers security teams to analyze, respond to, and mitigate incidents faster, more intelligently, and more efficiently. The Resilient IRP is the industry's only platform with Intelligent Orchestration, enabling teams to integrate and automate people, processes, and technologies in a single, open incident response hub. With Resilient, security teams can have best-in-class response capabilities. IBM Resilient has 300 global customers, including 60 of the Fortune 500, and hundreds of partners globally.**
